FastTrack Bundle for Password Synchronization
Using IBM Tivoli Directory Integrator

Gemini Systems is offering a FastTrack bundle for rapidly implementing user password synchronization across multiple enterprise directories. At the heart of this offering is IBM Tivoli Directory Integrator, which provides a proven mechanism for synchronizing identity data that resides in heterogeneous data stores.

Enterprises strive to implement password synchronization to decrease the costs of handling forgotten logon credentials and to address the risk of the individuals selecting passwords that are easy to guess. Keeping the passwords synchronized across the directories allows enterprises to establish and enforce a consistent password policy, while allowing the users to choose strong but easy to remember passwords.

The FastTrack Bundle for Password Synchronization supports multiple user directories, including Active Directory, IBM Directory Server, Domino Web Access, Sun ONE, and local account databases on Windows and UNIX platforms. This limited-time offer combines Tivoli Directory Integrator software licenses and Gemini Systems' unmatched expertise to help enterprises build a reliable password synchronization scheme.

	FastTrack Standard	FastTrack Extended	Custom Solution
IBM Software			
IBM Tivoli Directory Integrator (TDI) 6.1	Up to 500 users	Up to 1,000 users	Per Proposal
Services			
Planning session focused on business and security goals	◆	◆	◆
Design of the password synchronization workflow	◆	◆	◆
Installation and configuration of TDI software	◆	◆	◆
Integration with user directories (LDAP, Active Directory, etc.)	2 directories	3 directories	Per Proposal
Creation and testing of the password synchronization workflow	◆	◆	◆
FastTrack Bundle Pricing	**$14,999**	**$25,999**	**Per Proposal**

Standard and Extended bundles support one-to-many password synchronization from one directory to the others. Custom solutions can implement many-to-many synchronization schemes, as well as other customizations that reflect the organization's unique requirements.
